

Aslzoda Bozorboyeva

Mobile App Developer

PROFESSIONAL SUMMARY

Highly motivated and adaptable Android Developer and Architect with a profound passion for mobile ecosystem engineering and design aesthetics. Expert in blending robust, minimalist Clean Architecture with premium, intuitive UI/UX experiences. Formally recognized in regional tech incubators and global innovation programs for developing AI-driven IoT ecosystems and predictive analytics platforms. A collaborative problem-solver dedicated to translating complex technical systems into elegant, scalable software solutions.

WORK EXPERIENCE

Android Developer | BlueMesa Digital

Uzbekistan, Khorezm

December 2025 – Present

- Built premium, interactive UI features using Jetpack Compose for next-generation mobile applications.
- Resolved 20+ critical mobile bugs and optimized core view architectures across native Android environments.
- Engineered reusable UI components and custom layout modifiers, reducing boilerplate and duplicate code by approximately 15%.
- Integrated robust REST API endpoints and Firebase services for identity verification, profile management, and real-time data screens.
- Spearheaded QA testing cycles and enhanced ecosystem reliability, achieving a 99%+ crash-free session rate.
- Collaborated actively in Agile sprints using Git/GitHub for efficient version control and structured code reviews.

PROJECTS

SolorGuard

Khazarasp, Khorezm

April 2026 – June 2026

Mobile Architecture & Core: Kotlin, Jetpack Compose, Clean Architecture, Android SDK

AI & Analytics: Computer Vision (Thermal Image Processing), Predictive Analytics Frameworks

IoT & Hardware Integration: Smart Sensors & Hardware Communication, Real-Time Data Streaming

Backend & Cloud Infrastructure: Firebase (Real-time Database, Authentication), REST APIs

Version Control & Tools: Git, GitHub, Android Studio

SolorGuard App

LANGUAGES

English

B2

Uzbek

Native speaker

Russian

Basic communication skills

SKILLS

Mobile Development: Kotlin, Android Studio, Java, Jetpack Compose

Backend & Data: REST APIs, JSON, Firebase, Room, Firestore

Testing & Quality: Espresso, Unit Testing, Bug Fixing, Debugging

Tools & Workflow: Git, GitHub, LinkedIn, Figma, Android Development, Kotlin, Jetpack Compose

Languages: English - Middle, Uzbek - Advanced, Russian - Basic

EDUCATION

■ Java Intermediate | IT Park

Khazarasp, Khorezm

August 2024 – May 2025

Intermediate level

Java Intermediate: OOP Principles, Collections Framework, Multithreading, Exception Handling, I/O Streams, Lambda Expressions & Streams API, Gradle/Maven.

■ Kotlin Professional | IT Park

Khazarasp, Khorezm

June 2025 – December 2025

Score: Advanced

Kotlin Advanced: Coroutines & Asynchronous Programming, Kotlin Flow (StateFlow/SharedFlow), Jetpack Compose, Dependency Injection (Hilt/Dagger), Extension Functions, Scope Functions, Clean Architecture, Sealed Classes & Advanced Type Systems.

■ Android Development | IT Park

Khazarasp, Khorezm

June 2025 – Present

Score: Middle

Deepened expertise in native mobile engineering by mastering clean architecture patterns, modern asynchronous programming, and state management. Successfully built and optimized real-world mobile solutions using Jetpack Compose, handling end-to-end integration with cloud backends and REST APIs. Focused on translating complex system logic into scalable, high-performance Android applications with premium user experiences.

■ Cinema 4D | CreativeTech.uz

Tashkent, UZ; online

September 2025 – Present

Score: middle

Mastered 3D modeling, lighting, and animation principles to elevate mobile user experience and interface aesthetics. Focused on creating premium, minimalist 3D assets and motion graphics designed for seamless integration into cutting-edge digital products and modern app interfaces. Developed a deep understanding of visual hierarchy, spatial design, and premium look-and-feel transitions.

COURSES & CERTIFICATIONS

■ Android Developer | Udemy

Online

January 2024 – Present

Middle

■ FreeCode Camp | B1 English for Developers

Online

January 2026 – February 2026

Completed

Earned professional certification in English for Developers, focusing on

technical communication, industry-standard terminology, and collaborative workflows. Equips the ability to comprehend complex technical documentation and participate efficiently in international project environments.

🔗 B1 English for Developers

■ Sololearn | Social Media Marketing with AI

Online

June 2025 – August 2025

Beginner

Earned professional certification in core programming concepts, software logic, and algorithmic thinking. Demonstrates proficiency in basic data structures, control flows, and clean syntax principles required for efficient and organized software engineering.

🔗 Sololearn

■ Sololearn | Web Development

Online

September 2025 – October 2025

middle

Certified in core programming methodologies, syntax control flows, and algorithmic logic. Validated essential computer science foundations, including structural problem-solving and clean code paradigms. Demonstrates a strong capability to adapt to diverse technology stacks and design scalable, well-structured software architectures.

🔗 Web Development

■ Sololearn | Java Intermediate

online

August 2025 – August 2025

intermediate
